

CCAM
presents:

Python Workshop

Presenter: Brian Vegetable

About the Instructor

Mr. Vegetable is a 4th year PhD candidate studying statistics at the University of California, Irvine, working under the supervision of Professor Hal Stern. His research interests are primarily in causal statistics related to observational studies, specifically focusing on applications related to studying human behavior. Mr. Vegetable helped develop and regularly teaches a popular course entitled Predictive Modeling With Python for the UCI Data Science Initiative Center. He also has an undergraduate degree in aerospace engineering and worked as a systems engineer performing satellite operations for the Chandra X-Ray Observatory, where he developed python scripts to analyze mission statistics.

Thursday, November 4, 2016

Location: MH 236

Time: 2:00-6:00 p.m.

Refreshments will be served
